

RED – Prem's thoughts

Feature			Simple Explanation
1	F-001	User Platform	Keeps trader login safe and secure Using codes that change and expire everyday anyways
2	F-026	User Platform	Handles login and token process Make it possible to send emails for the new code (every market open, code expires at market close of the same day)
3	F-051	User Platform	First login screen traders see
4	F-076	User Platform	Records every login for security Security Log – add location access and add a familiarization block for a given 'home' address for the user
5	F-101	User Platform	Manages trader accounts and access
6	F-002	User Platform	Saves dashboards, layouts, and widgets
7	F-027	User Platform	Loads S&P 500 chart automatically
8	F-052	User Platform	Displays charts and widgets live
9	F-077	User Platform	Shows key stock information quickly Optimize and focus on efficiency in the UI logic
10	F-102	User Platform	Starts every scan and trade cycle
11	F-003	Market Data	Brings live price data into platform
12	F-028	Market Data	Connects and maintains data feeds
13	F-053	Market Data	Provides data for indicator calculations
14	F-078	Market Data	Checks if market data is fresh Compare values for 5 minutes every 30 minutes as a calibration cycle. Every 30 minutes of rest, a 5 minute calibration period starts, checking each second if the data on APEX's charts are the same @ WTC. Full chart refresh with banner pop-up notif that informs user of the

			mismatch and that it was fixed (in the case that APEX finds chart ticks are mismatched, wrong, and/or outdated data)
15	F-103	Market Data	Controls scans during market hours
16	F-004	Technical Analysis	Finds important MACD trade signals
17	F-029	Technical Analysis	Spots overbought and oversold conditions Build IV, BB/RSI, and Extrinsic Value analysis+relative analysis in order for this to work.
18	F-054	Technical Analysis	Confirms trend direction using EMAs
19	F-079	Technical Analysis	Tracks volatility and breakout zones Train model with pattern recognition, avoid using online resources, rather use fake charts and interact with it showing all possible cases, flexibility, range, etc. Also bring in and mix as a hybrid with real historical data
20	F-104	Technical Analysis	Confirms trends and stop-loss levels Use same logic above for training to spot trends, as for SL, use a hard, rule of thumb SL @ previous swing low/swing high (up and downtrend respectively), later then let model train itself on SL for custom values e.g. -12.5% of expected profit from original long position.
21	F-129	Technical Analysis	Confirms moves with volume and pivots
22	F-005	Technical Analysis	Detects common candlestick trade patterns Simple injected pattern recognition is enough for common candlestick trade patterns, just have to also train it to be flexible, in case something

similar shows but model does not recognize/does not deem it matches correctly.

23	F-030	Technical Analysis	Finds larger chart pattern setups
24	F-055	Technical Analysis	Scores patterns based on strength
25	F-080	Technical Analysis	Finds support and resistance zones
26	F-006	Technical Analysis	Main chart traders interact with
27	F-031	Technical Analysis	Turns EMA data into signals
28	F-056	Technical Analysis	Combines indicators into trend verdict
29	F-081	Technical Analysis	Lets traders draw trendlines manually
30	F-007	Options Intelligence	Provides live options chain data
31	F-032	Options Intelligence	Shows options data under chart
32	F-057	Options Intelligence	Filters strikes for easier selection
33	F-082	Options Intelligence	Tracks unusual options activity changes
34	F-107	Options Intelligence	Avoids bad trades with poor liquidity
35	F-132	Options Intelligence	Chooses correct option strike legs
36	F-008	Options Intelligence	Measures option price movement exposure
37	F-033	Options Intelligence	Shows time decay on options
38	F-058	Options Intelligence	Tracks risk from fast price moves
39	F-083	Options Intelligence	Finds options sensitive to volatility
40	F-108	Options Intelligence	Shows Greeks in one dashboard
41	F-009	Volatility	Calculates current implied volatility live
42	F-034	Volatility	Compares volatility across past periods
43	F-059	Volatility	Shows IV compared to HV
44	F-084	Volatility	Measures if volatility is expensive
45	F-109	Volatility	Labels market volatility conditions clearly
46	F-134	Volatility	Detects volatility spikes before events
47	F-010	Sentiment	Collects live news for each ticker
48	F-035	Sentiment	Turns news into market sentiment

49	F-060	Sentiment	Gives one simple sentiment score
50	F-085	Sentiment	Finds large unusual options trades
51	F-110	Sentiment	Summarizes important SEC filing events
52	F-011	Fundamentals	Compares earnings results to expectations
53	F-036	Fundamentals	Checks company revenue and income growth
54	F-061	Fundamentals	Compares valuation against similar companies
55	F-086	Fundamentals	Shows analyst ratings and targets
56	F-111	Fundamentals	Tracks earnings and major catalysts
57	F-136	Fundamentals	Combines company health into score
58	F-012	AI	Main AI engine behind scoring
59	F-037	AI	Shows what drives the score
60	F-062	AI	Chooses the best strategy path
61	F-087	AI	Explains strategy in simple English
62	F-112	AI	Gives entry, target, and stop levels
63	F-137	AI	Builds clear trade action checklist
64	F-013	AI	Blocks weak trades below threshold
65	F-038	AI	Checks risk before placing trades
66	F-063	AI	Handles mixed or unclear signals
67	F-088	AI	Summarizes trade logic before execution
68	F-014	AI	Explains agreement and disagreement signals
69	F-039	AI	Shows score breakdown visually
70	F-064	AI	Gives written reason for trades
71	F-015	Risk	Sets maximum loss per trade
72	F-040	Risk	Calculates safe trade size
73	F-065	Risk	Tracks live profit and loss
74	F-090	Risk	Measures total portfolio Greek risk
75	F-115	Risk	Alerts when portfolio risk grows
76	F-016	Risk	Shows all open option positions
77	F-041	Risk	Tracks watched stocks in one panel
78	F-066	Risk	Records completed trade history

79	F-091	Risk	Shows strategy performance snapshot
80	F-017	Execution	Connects platform to broker account
81	F-042	Execution	Lets admins add broker keys
82	F-067	Execution	Allows testing with paper trading
83	F-092	Execution	Monitors broker connection health
84	F-018	Execution	Sends trades when score qualifies
85	F-043	Execution	Lets trader cancel or adjust orders
86	F-068	Execution	Builds better limit order prices
87	F-093	Execution	Tracks order status until filled
88	F-118	Execution	Creates final trade confirmation record
89	F-143	Execution	Records every order event permanently
90	F-020	Learning	Simulates trading without real money
91	F-045	Learning	Tests full APEX scan process
92	F-070	Learning	Saves paper trade results
93	F-022	Reporting	Creates downloadable trade summary reports
94	F-047	Reporting	Logs daily scans and results
95	F-023	Monitoring	Shows system and data health
96	F-048	Monitoring	Sends alerts when errors happen
97	F-024	Security	Protects financial and trading data
98	F-049	Security	Prevents API overuse and abuse
99	F-025	Administration	Stores broker keys securely
100	F-050	Administration	Sends important alerts to traders
